Environmental Hygiene Products Limited manufactures and supplies a wide range of sackholders and wastebins to all industry sectors throughout the world. A family business in existence for over 20 years, the company is one of the largest dedicated healthcare standard sackholder manufacturers in the UK. An approved supplier to the UK government run National Health Service, the company supplies customers across the EU, Africa and Middle East primarily in the following industry sectors:

- Hospital and Associated Healthcare Users
- Education
- Janitorial Suppliers and End Users
- Public Sector – e.g. Local and National Government, Prisons
- Defence Industry

In addition, Environmental Hygiene Products Ltd is ISO 9001:2000 certified for both the manufacture and supply of wastebins and sackholders.

Features:

Two years warranty – all EHPL premium range products come with a two year warranty. The durable construction of the products, which includes extensive use of galvanised steel on the metal products, leads to a product which is not only fit for heavy commercial use but is also designed to last. As an example the company knows of products supplied 13 years ago which are still in daily use. Each bin sold has a unique serial number allowing full product tracking to be carried out

Technical Backup – all customers and end users can contact the manufacturer direct for assistance and backup – call +44 (0) 1862 89 39 78

Fire Retardant – All fire retardant bins have been tested to the relevant UK Government technical memo standards for fire retardancy and non-flammability.

Colour Coding – as Environmental Hygiene Products Ltd manufactures its sackholders in house, any combination of colours can be supplied thus allowing branding or more importantly, proper waste segregation (for example in the UK National Health Service under HTM07-01).

Colours

As we manufacture in the UK, we can provide your waste bins in any colour you wish. However, we provide the following colours as standard at no extra cost:

Standard Colours

Healthcare Standard Colours

How to order

- Pick your style of sackholder
- Pick the size you require
- Pick the body colour you wish
- Pick the lid colour you wish
- Add any options
 - silent closing
 - antimicrobial coating
 - metal sack band when applicable

(remember, rubber feet are standard throughout and wheels and handles are fitted as standard to all 50, 70 and 90 litre models)

- Call 01862 893978 or email info@ehpl.net for the best price

Please note, all orders are subject to our standard terms and conditions of sale.

Fire Retardant Solid Body Hands Free Lid

Designed for use in all areas for domestic and clinical waste. Users include hospitals, schools, laboratories, janitorial suppliers and others who require hands free operation to save the user touching the bin by hand. Made from corrosion resistant materials and available in any colour combination, these sackholders are effectively the healthcare standard waste bin in the UK.

- Add any options
- silent closing
 - antimicrobial coating
 - metal sack band when applicable

width: 425mm
depth: 440mm

Fire Retardant Hands Free Removable Body

Hands free sackholders are designed for operation using only the foot pedal. This helps minimise the risk of cross infection in high risk areas and in hospitals can help meet the requirements of infection control. This corrosion resistant bin features a removable body to facilitate easy cleaning and sterilisation.

- silent closing
 - antimicrobial coating

HFOM1037
 Hands Free Medium 70 litre
 height: 810mm
 width: 410mm
 depth: 440mm

Features

-  Front opening
-  Pull out handle
-  Hands Free
-  Silent closing option
-  Wheels for easy movement and protective rubber feet
-  Bungee bag holder
-  Rounded corners
-  Fully tested to Hospital technical memorandum 05-03 Part A (2008)

Fire Retardant Recycling Non-Fire Retardant Recycling

Made from corrosion resistant materials, this range is designed for use in all areas for any recycling and can be supplied in a variety of industry recognised colours for own labelling. The range of fire retardant solid body sackholders can be manufactured with the option of a hands free lid design, while the open free standing sackholders can allow the use of clear bags to reinforce the waste stream being recycled. The front opening option allows the easy removal of bags along with further ease of cleaning.

Nappy & Sanibin Bins

The feminine hygiene bins and nappy bins are for the disposal of sanitary waste. Manufactured from strong plastic throughout in a new slim line design.

The nappy bin has a recessed handle on top and sides for easy handling. Fitted with a press-on lid and specially designed top opening chute ensuring the contents cannot be seen by the user.

Can be used with or without plastic sack giving the option to use a special germicide.

Sanibin 15 litre
height: 480mm
width: 160mm
depth: 430mm

Anti microbial coating

Environmental Hygiene Products Ltd, the UK's leading manufacturers and suppliers of sackholders have developed, in conjunction with leading industry experts, an antimicrobial coating offering a total surface hygiene system that is safe and long lasting.

The silver ion based protection agent is added to the powder coating during manufacture and contains no active chemical agents. Silver, which has been recognized as having antibacterial properties for centuries, inhibits the growth of many bacteria and micro-organisms (such as MRSA), meaning that they cannot live and breed on protected surfaces. As a biocide, the silver based ions will last the lifetime of the product and will continue to interrupt a cell's ability to function, grow or reproduce. Of course, such coatings should always be used in conjunction with industry standard hygiene and cleaning practices to further reduce any risk of cross contamination

Fire Safety

Our sackholders have undergone extensive fire safety tests at the leading test house, Warrington Fire, to the standards required by the UK Government's Health Technical Memorandum 05-03 Part A (2008) Fire Safety in the NHS - Section 3.12.

The UK's leading manufacturer
and supplier of sackholders
